DETAILED ACTION

Application Status

1. By virtue of a preliminary amendment filed on August 29, 2001, Claims 1-25 have been cancelled and Claims 26-45 have been added.

Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
 - I. Claims 26-42, drawn to DNA encoding methylmalonyl CoA epimerase, vectors and host cells thereof and methods of making said epimerase, classified in class 435, subclass 233.
 - II. Claims 43-45, drawn to methods of making (S)-methylmalonyl CoA, classified in class 435, subclass 88.

3. The inventions are distinct, each from the other because of the following reasons:

Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case, (S)-methylmalonyl CoA can be made in a host cell that naturally contains and expresses the *P. shermanii* epimerase gene and naturally contains (R)-methylmalonyl CoA; transformation and/or transfection are not required. Thus, Groups I and II are patentably distinct. Because these inventions are distinct for the reasons given above and

Art Unit: 1652

have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Notice of Possible Rejoinder

4. The Examiner notes that if claims in Group I are found directed to an allowable product, then claims in Group II, which are directed to processes of using the patentable product, previously withdrawn from consideration as a result of a restriction requirement, would now be rejoined pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86; see also M.P.E.P. § 821.04, *In re Ochiai*, and *In re Brouwer*). Since process Claims 7, 15, and 17 would be rejoined and fully examined for patentability under 37 C.F.R. § 1.104, Applicants are instructed to amend the processes claims as deemed necessary according to rejections made against the elected claims.

Election

5. A telephone call was made to Carolyn Favorito on June 4, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1652

application. Any amendment of inventorship must be accompanied by a request under 37 C.F.R.

§ 1.48(b) and by the fee required under 37 C.F.R. § 1.17(i).

Conclusion

6. A complete response to the instant Office action must include an election of invention to be examined.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kathleen M Kerr whose telephone number is (703) 305-1229.

The examiner can normally be reached on Monday through Friday, from 8:30am to 5pm.
